

Veefil ^{RT}

50kW DC FAST CHARGER

e-Mobility solutions from Gilbarco Veeder-Root

Fuelling the future, today.

More than 100 years after the first battery-powered production vehicle hit the road, the global mobility market is changing faster than ever in the face of the e-Mobility revolution.

By 2025, there will be an estimated 11 million electric vehicles on the road worldwide, as drivers opt for greener, more economical motoring solutions. The race is on to develop a charger infrastructure and Gilbarco Veeder-Root now provide the perfect solution for forecourt owners to join the race - and win.

Fast charging on the go.

The perfect solution for each and every forecourt.

50kW DC fast charger
30mins of charging = 100km driving (approx)

Drive more c-store revenue as drivers take the opportunity to shop and recharge their own batteries on site.

Stand out from the competition and build loyalty as EVs become more popular.

Liquid cooling and weather-tight casing for low maintenance in all conditions.

High customisability and interface options for seamless integration into your forecourt.

Why Veefil?

Smallest footprint

- o The Veefil-RT is the world's most slimline DC fast charger. Saving approximately 50% premium space as compared with other DC Fast Chargers.
- o The compact Veefil-RT fits where other DC Fast Chargers can't go. Increasing your site location options, and maximizing car park potential.

Most lightweight

- o The Veefil-RT weighs just 165kg. That's less than half the weight of other DC Fast Chargers which weigh in the range of 350kg – 600kg.
- o The Veefil-RT is easier and cheaper to transport, handle, and install – by hand. No cranes or large concrete foundations required, thus saving you valuable time and money.

Increased reliability

- o The Veefil-RT offers unique and patented liquid cooling technology. Unlike with other air-cooled chargers, the Veefil-RT eliminates the need to clean and replace dusty air filters. So you can benefit from maximum reliability for the lowest maintenance.
- o Fully sealed, IP65 protected electronics. For best in class performance in even the most extreme environmental conditions.

Most secure investment

- o Ultimate peace of mind with our free 3 year warranty, plus the option to extend it to 5 years.

Maximum accessibility

- o The Veefil-RT speaks one universal language through its simple and intuitive User Interface. Illuminated icons walk users through the charging process for the ultimate ease of use.
